

Le climat équatorial

Sur base des documents ci-dessous, caractérisez le climat équatorial.

Températures :

Précipitations :

$$^{\circ}C = \frac{^{\circ}F - 32}{1.8}$$

1 inch(pouce) = 25,4 mm

Donc, 64 °F =	°C	Donc, 20 inches =	mm
72 °F =	°C	40 inches =	mm
82 °F =	°C	60 inches =	mm
		80 inches =	mm
		100 inches =	mm
		120 inches =	mm
